3) Open the file you want to print with Adobe Photoshop. If, opening the file, the incorporated color profile is recognized by Adobe a message will be opened, than behave like in the image 2; if the color profile isn't recognized you should seelect manually "assign working RGB: Adobe RGB 1998" Like in the image 2 bis. If the color profile is already setted the file wil be automatically recognized and the image will be opened.

Embed	ded Profile Mismatch
